4. OPERATION

4.1. CHARGING

- 4.1.1. The battery fitted to this lamp is considered to be a consumable item and its ability to accept charge will reduce over time. We will warranty it against mechanical and electrical defect for a period of one year, this does not cover fair wear and tear. If the battery is not properly charged before first use, or regularly conditioned, its capacity will diminish. Under these circumstances we will not replace the battery even if it is less than one year old.

Note: The torches will flash when the battery gets low.

- 4.1.2. Connect the charger into the charge socket on the lamp, see fig.1. Plug into power supply and turn on, the red charge LED on the lamp will light as the battery charges. When fully charged the LED turns green.

- 4.1.3. When the battery has fully charged (approx 3hrs) Disconnect from mains supply.

Note: The Lithium battery does not suffer from memory effect and once fully charged may be stored for up to six months without another charge.

- 4.2. Unfold lamp. Select either directional torch or inspection lamp. Brightness is controlled by dimmer switch.

- 4.3. Lamp can be hung from the hook or attached using magnets.

- 4.4. When the lamps are docked in the station (LED1801K) you can turn both of the docked torches on by using the On/Off button on top of the unit.

5. MAINTENANCE

- 5.1. Keep lamp clean and check for damage before every use. If damage is observed, remove from use until unit is repaired.

- 5.2. The battery is not designed to be removed .
